SYSTEM ADVANTAGES

ENGINEERED WITH PURPOSE. FUNCTIONALITY THAT DELIVERS.

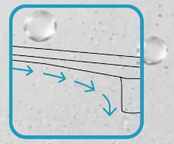

Our shower drain systems unite intelligent functionality, premium materials and minimalist design. Designed for maximum planning reliability, efficient installation and durable everyday quality.

For maximum design flexibility, our shower drains are available in a range of standard lengths and can be precisely cut to the required size – down to a minimum length of 40 cm.

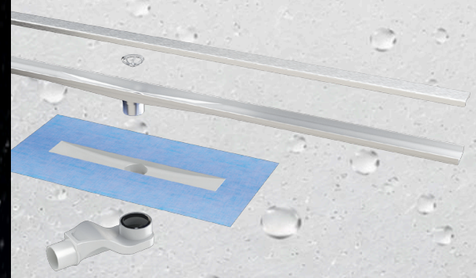

The pre-slope ensures reliable water drainage and consistently high drainage performance. At the same time, it promotes a natural self-cleaning effect, making the shower drain exceptionally easy to clean.

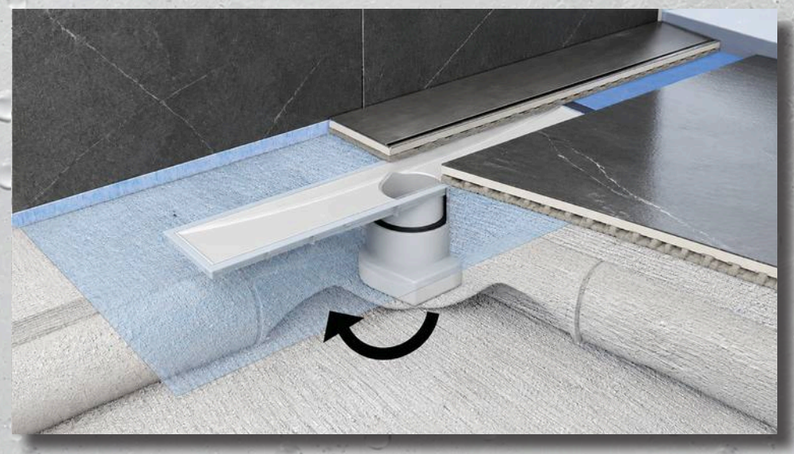

Manufactured from premium stainless steel 1.4301 / V2A (AISI 304) for the highest demands on quality and durability.

Thanks to its well-engineered system design, the shower drain can be installed quickly and effortlessly. The ultra-compact, 360° rotatable horizontal outlet, flexible waterproofing membrane and precisely adjustable profile ensure easy installation and optimal adaptation to any installation situation. The system is complemented by a comprehensive range of accessories and practical installation aids included as standard.

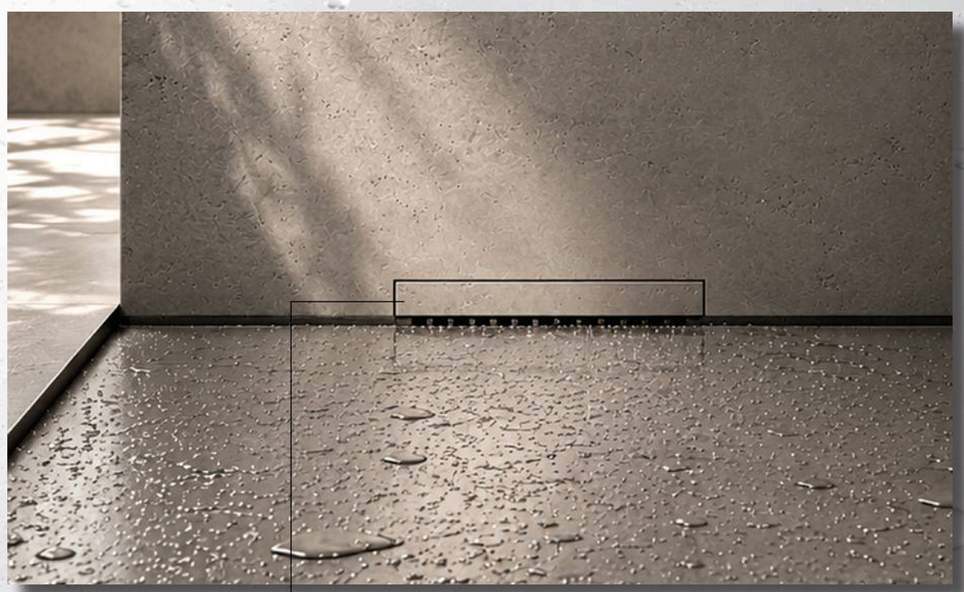

GRUEN

Shower channels

Wall-In

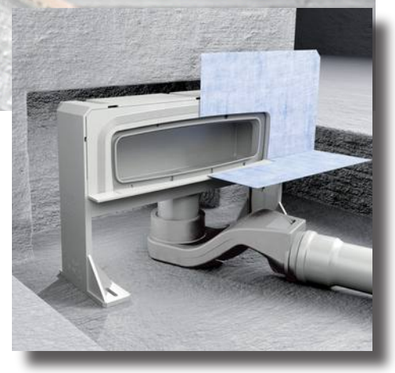

Wall-In – The World´s First Cut-to-Length Wall Drain.

GRUEN´s innovative solution for maximum design freedom in the shower. Integrated into the pre-wall, the Wall-In drain enables a seamless, uninterrupted shower floor. The factory-fitted waterproofing membrane ensures secure and effortless sealing. Ideal for both new-build projects and renovations.

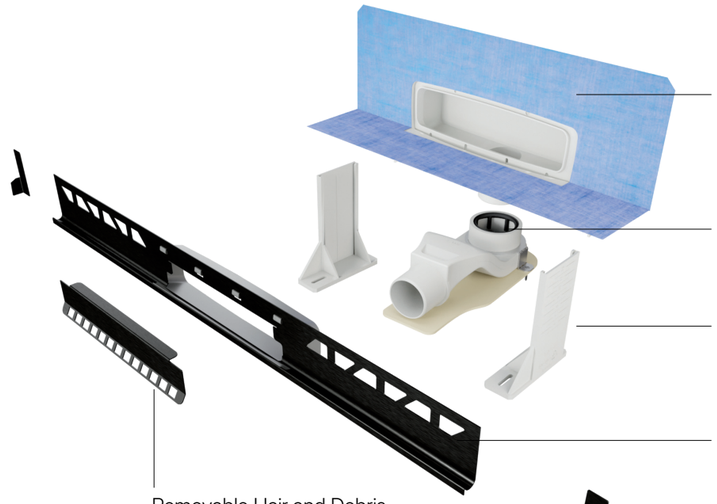

Winner of the prestigious iF Design Award 2018 for outstanding design and innovative product development.

Pera

ZERO-TO-WALL

Pera combines elegant design with outstanding functionality.

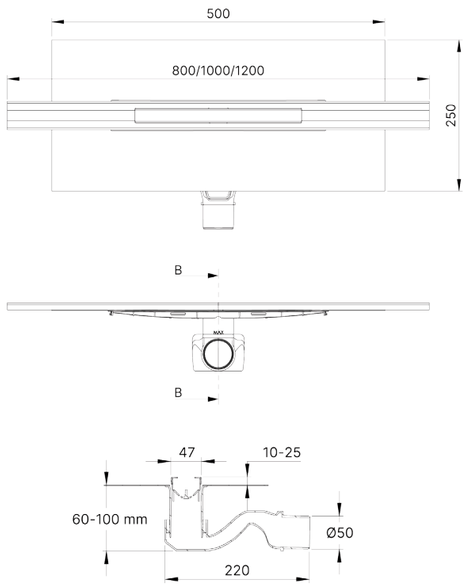

Pera combines elegant design with outstanding functionality. The open water flow ensures exceptionally easy cleaning, while the low installation height and compact drain body provide maximum flexibility during installation. The innovative ZERO-TO-WALL installation allows the channel to be positioned directly against the wall, reinforcing its clean, minimalist aesthetic. Available in lengths of up to 160 cm and can be individually cut to size, Pera adapts to virtually any installation situation. Offered in Brushed Stainless Steel, Brushed Anthracite, Satin Gold and Satin Bronze, Pera integrates seamlessly into contemporary bathroom concepts.

TileLine

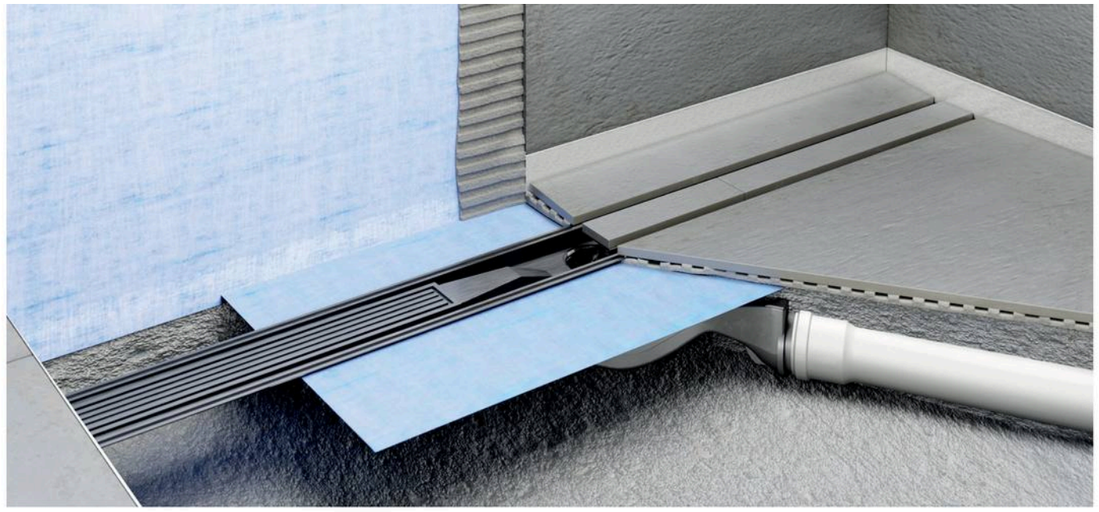

TileLine stands for virtually invisible drainage and maximum design freedom.

The tileable shower channel enables a virtually invisible integration into the floor, allowing the tile surface to continue seamlessly for a clean, uninterrupted appearance. Only two discreet drainage slots remain visible. Thanks to the innovative ZERO-TO-WALL installation, the channel can be positioned directly against the wall, creating a refined, minimalist architectural aesthetic. An integrated inspection opening provides convenient access to the siphon at any time, ensuring effortless cleaning and straightforward maintenance.

Highline

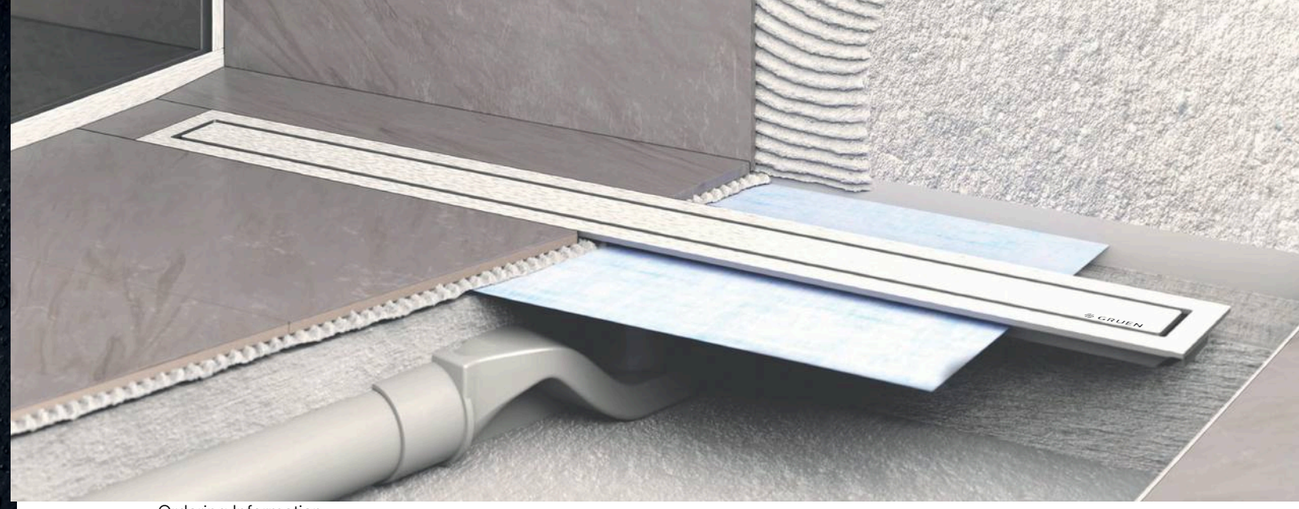

Highline embodies distinctive design and uncompromising excellence.

The 3 mm thick stainless steel frame and solid stainless steel cover give Highline a distinctive, premium appearance that pairs exceptionally well with large-format tiles and natural stone surfaces. Thanks to the innovative ZERO-TO-WALL installation, the channel can be positioned directly against the wall, creating a continuous, contemporary look with reduced grout lines. Clean lines, precise geometry and effortless cleaning make Highline the ideal choice for sophisticated bathroom architecture.

ARTstream

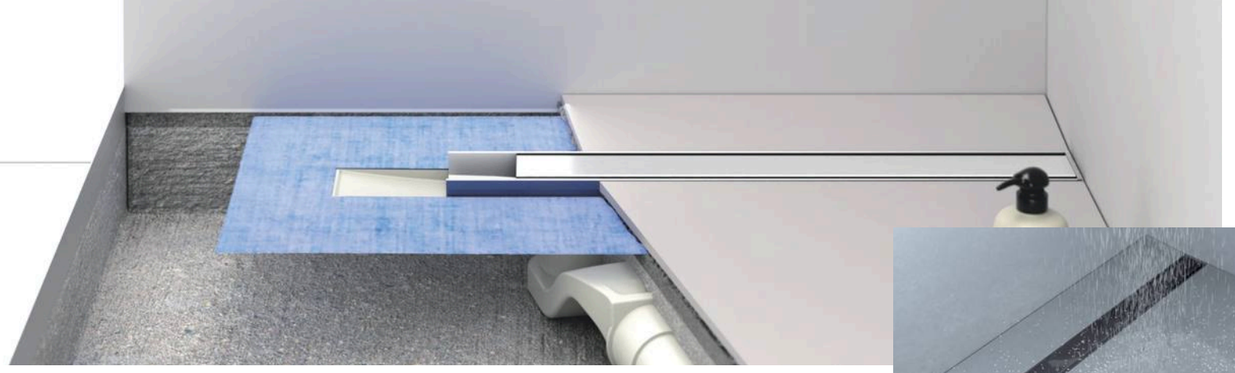

Reversible 2-in-1 Design

ARTstream – Premium Shower Channel with Minimalist Design

ARTstream is a straightforward solution for individually designed, floor-level showers. Available in a purist stainless steel finish or with a tileable recess, ARTstream allows the floor surface to continue seamlessly for a clean, uninterrupted appearance. Its flexible positioning enables installation directly against the wall, while the channel can be individually shortened for precise wall-to-wall applications.

With a minimal installation height of just 60 mm, the ultra-compact horizontal drain is particularly well suited to renovation projects. Defined by clean lines, precise geometry and a removable cover, ARTstream combines sophisticated aesthetics with effortless cleaning.

GRUEN

Point drains

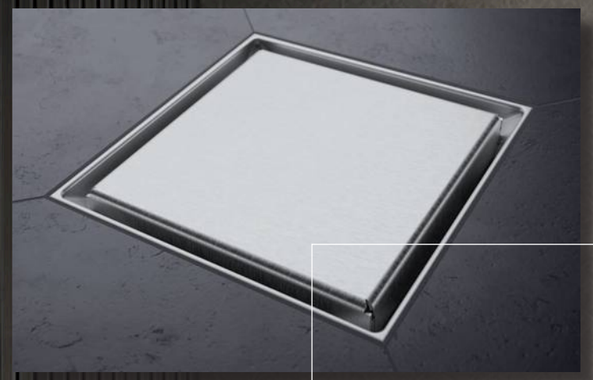

Design down to the Finest Detail

Clean lines, premium materials and versatile design options make our point drains the perfect complement to modern, level-access showers. Available in a classic stainless steel finish or as a tileable version for virtually seamless integration into the floor surface, our point drains combine reliable functionality with sophisticated design.

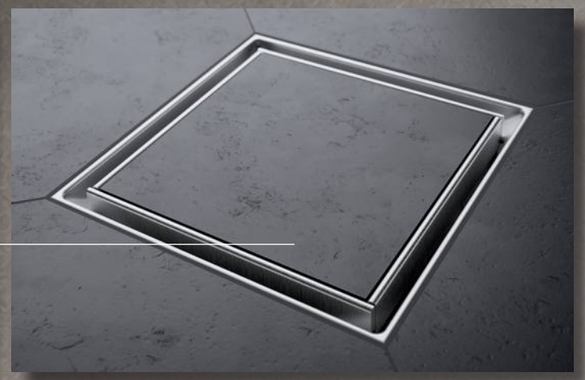

With the Nova, Unica, Aqua and Natura cover options, they offer individual design possibilities for a wide range of bathroom concepts. From distinctive stainless steel aesthetics to discreet integration into the tile surface, each solution creates a harmonious overall appearance that complements the architecture of the bathroom.

Precision manufacturing and high-quality materials ensure a durable and reliable solution for everyday use.
Available in 10 × 10 cm and 15 × 15 cm, our point drains provide maximum flexibility in planning and installation.

Unica

Premium stainless steel frame and cover made of stainless steel 1.4301 (V2A)

Integration into the GRUEN Smart Sealing System (abP-tested)

Ready-to-install complete set for fast and secure installation

Low installation height from 60 mm (PYS) or 80 mm (S-Type)

Eccentrically adjustable outlet connection (PYS) for millimetre-precise positioning of the stainless steel frame

Patented leveling and spacing system for precise alignment

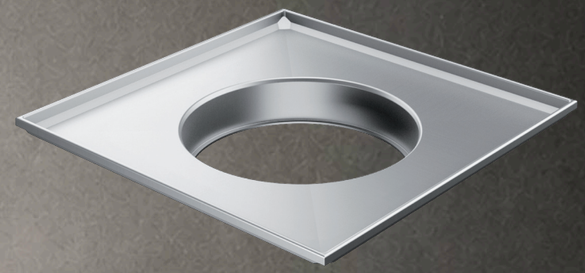

High-performance odour trap for reliable, long-lasting protection

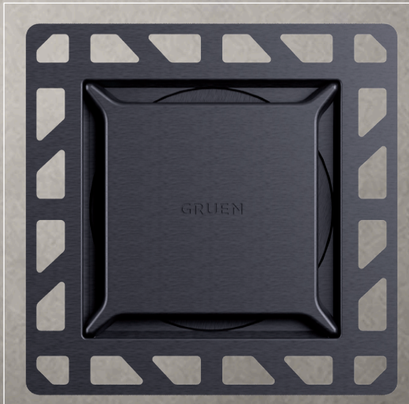

Integrated construction protection cover with funnel function for watertightness and bonding tests

360° rotatable DN 50 outlet connection on both versions

- ✓ Available in two sizes
- ✓ Premium stainless steel finishes
- ✓ Durable, robust and easy to maintain
- ✓ Ideal for modern, floor-level shower areas

The frameless Nomina strainer insert, made from high-quality plastic, enables virtually seamless integration into the tiled surface, creating a clean, contemporary and elegant appearance. 10x10 cm Item number SSD9-H24L10S9

GRUEN Siphons

Two Systems – One Solution

GRUEN floor drains provide the reliable foundation for all shower channels and point drains, offering the right solution for every installation scenario.

S-Type

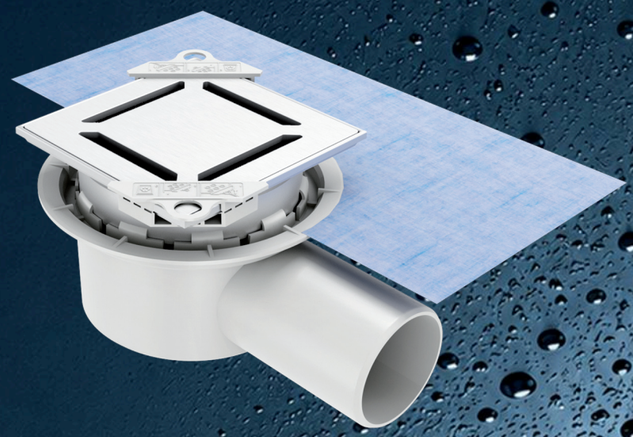

Flow Rate: 48 l/min

GRUEN floor drains are reliable solutions for floor-level showers. All components are precisely coordinated to ensure secure drainage and dependable waterproofing.

PYS

PYS Flow Rates: 32 l/min / 33 l/min

Stainless Steel Design Grate – Available in Various Designs

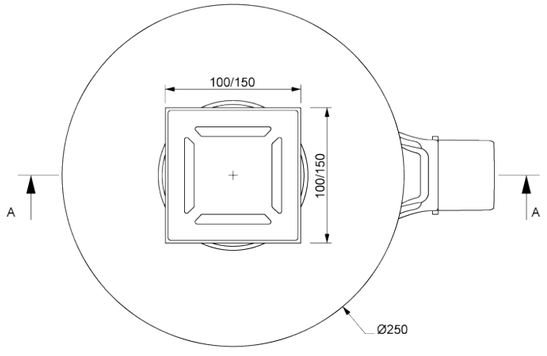

Removable Odour Trap – Effective Prevention of Unpleasant Odours

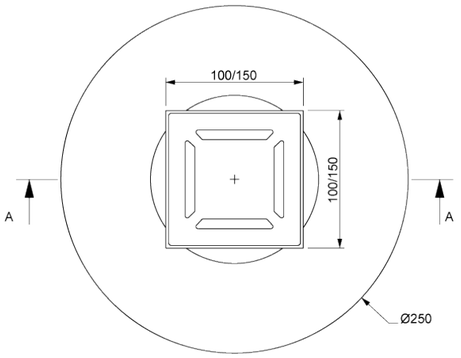

Hair and Debris Trap – Easy to Remove and Clean

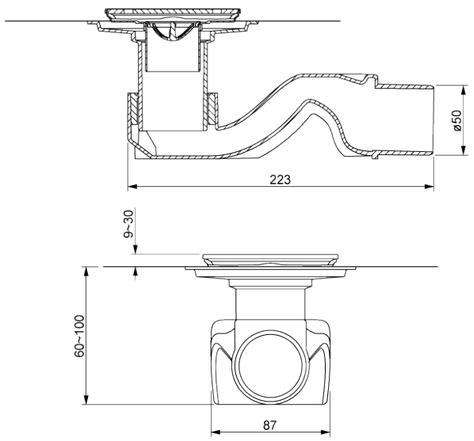

Sealing Membrane – Integrated for Secure Connection to Bonded Waterproofing Systems

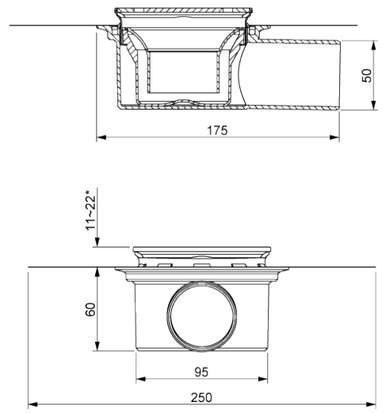

Drain Body – Rotatable DN 50 Drain Body for Flexible Installation

DN 50 Outlet
Integrated Sealing Membrane
Strainer Insert: 10 × 10 cm / 15 × 15 cm
PYS Flow Rates: 32 l/min / 33 l/min
S-Type Flow Rate: 48 l/min

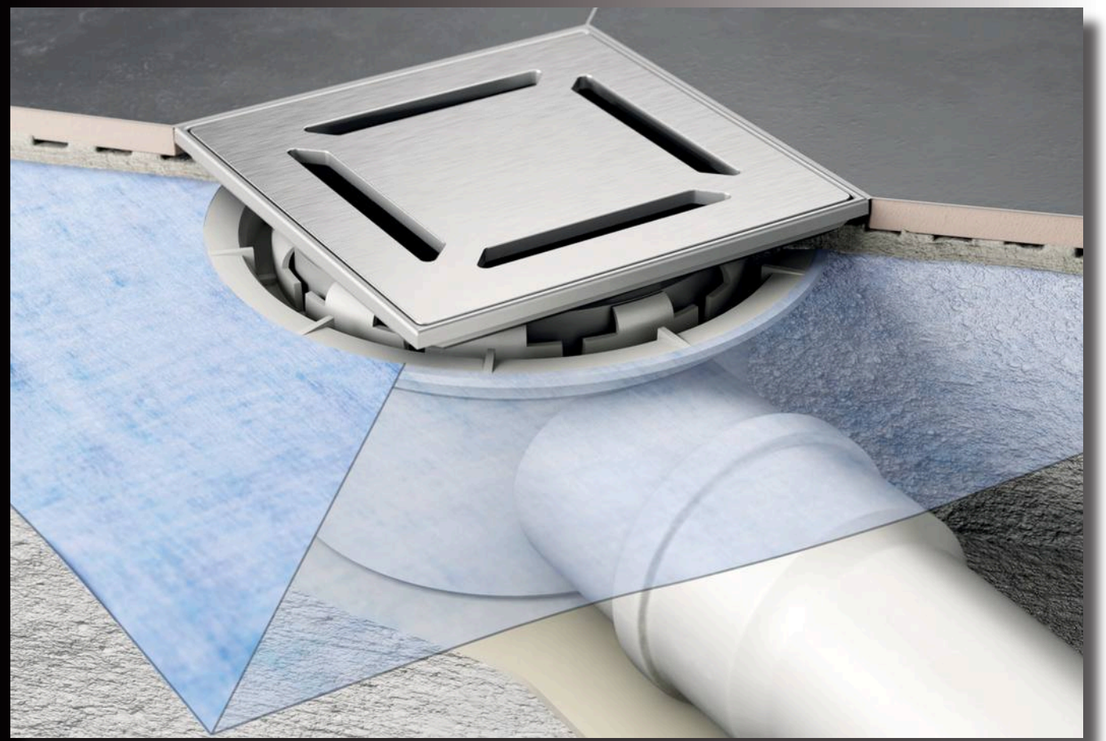

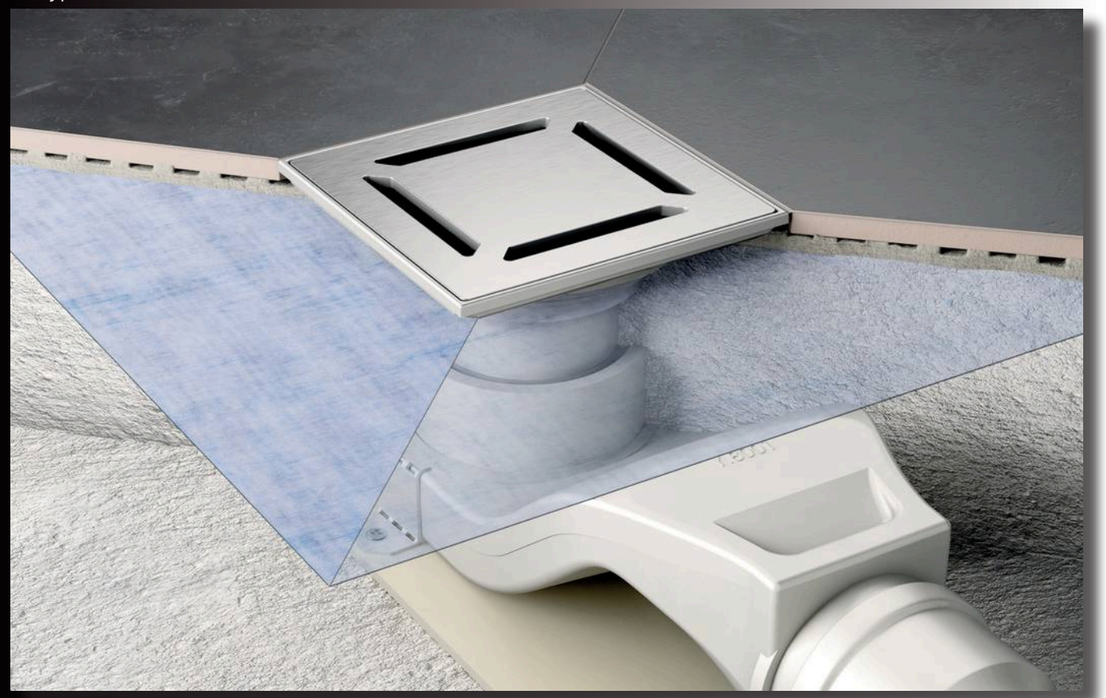

PYS Floor drain

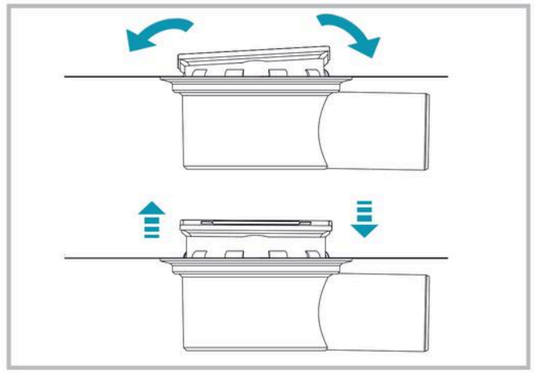

S-Type Floor drain

Smart Features

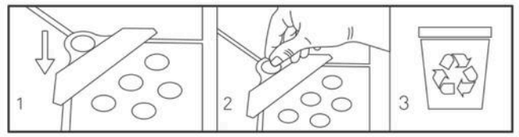

Eccentric, Adjustable Drain Outlet for Precise Positioning

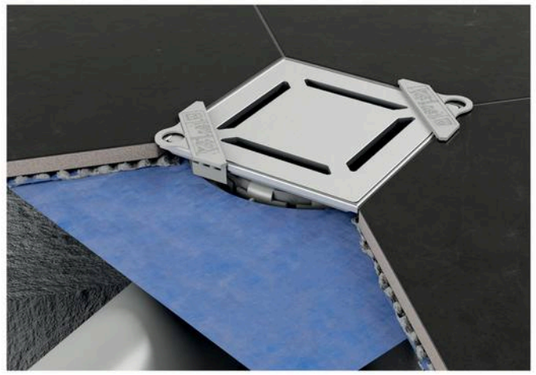

The drain outlet with flexible mounting brackets enables convenient fine positioning and accommodates the inclination of the stainless steel frame.

Easy, Precise Alignment

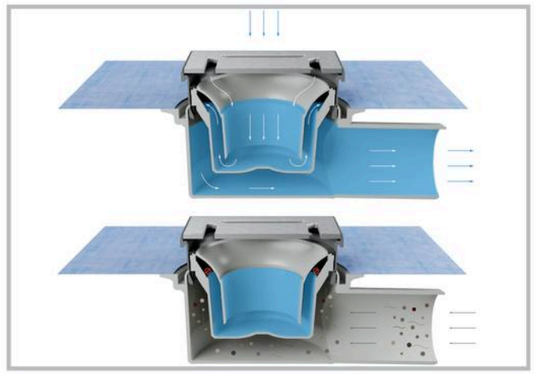

Patented leveling and spacing corners enable quick and precise alignment of the floor drain. Simply position the corners of the drain at the desired height before laying the screed. Once the screed has been installed, simply break off the visible part of the leveling and spacing corners.

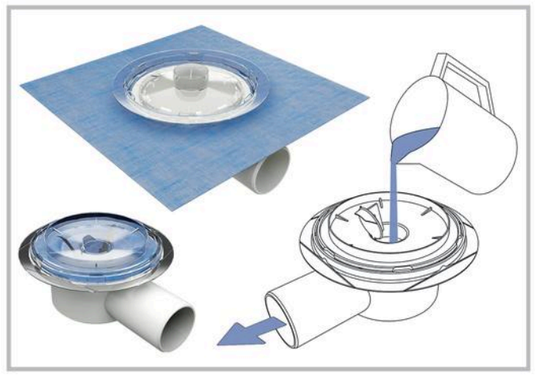

Effective Odour Protection. Easy Maintenance.

The integrated odour trap reliably prevents unpleasant smells from escaping. The easily removable hair and debris filter enables quick and convenient cleaning for lasting hygiene and performance.

Protective Construction Cover With Integrated Funnel

The protective construction cover safeguards the drain and sealing membrane against dirt and debris during installation. Once reversed and with the centre section removed, it serves as an integrated funnel for water-tightness and connection testing.

GRUEN ACCESSORIES & SPARE PARTS

Standard Drain Body
for All GRUEN Shower Channels

Ultra-Low Horizontal Drain Body (S-Type)
Minimum installation height of just 60 mm with DN50
Drainage capacity of up to 52 l/min
25 mm water height
360° rotatable for flexible installation
Self-cleaning effect

Item number
Y.8001

Alternative Drain Bodies

Horizontal Drain Body – Alternative to Standard Drain
(compliant with EN 1253)
Installation height of 80 mm
Drainage capacity of up to 60 l/min
50 mm water seal
360° rotatable for flexible installation
Self-cleaning effect

GRUEN

Corner Shelves

GRUEN corner shelves combine modern design with practical functionality. Available in various sizes, designs and finishes, they are offered in high-quality stainless steel or as a tileable version for seamless, virtually invisible integration into the wall surface.

Easy installation into the open joint enables quick and straightforward fitting while providing added convenience in the shower area. The perfect solution for stylish, modern bathrooms.

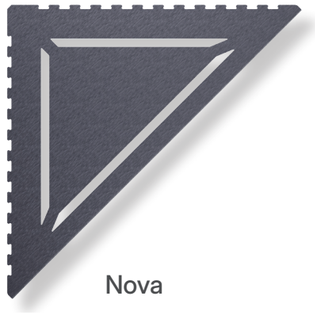

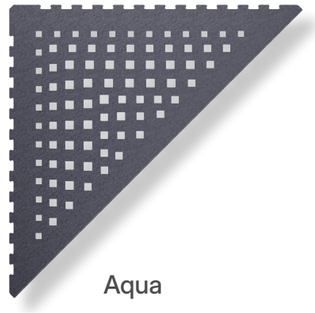

Product details

The elegant, floating appearance gives any tiled area a modern and minimalist aesthetic. Made from high-quality 1.4301 (V2A) stainless steel, the product is available in brushed stainless steel or as Black Inspiration with a premium anthracite PVD coating.

Two front edge lengths of 290 mm and 400 mm provide maximum design flexibility. Thanks to its well-engineered construction, the shelf can also be installed retrospectively in joints as narrow as 1.5 mm – making it an ideal solution for virtually any tiled area.

GRUEN Wall Niches

STAINLESS STEEL WALL NICHES – WHERE DESIGN MEETS FUNCTIONALITY

GRUEN wall niches provide additional storage while adding a stylish accent to modern bathrooms. Precisely crafted from high-quality stainless steel, the niche body features clean, carefully finished edges and exceptional workmanship.

Available in Brushed Stainless Steel, Brushed Gold, Brushed Bronze and Brushed Anthracite, the wall niches blend harmoniously into a wide range of bathroom concepts, adding an exclusive and sophisticated touch to any space.

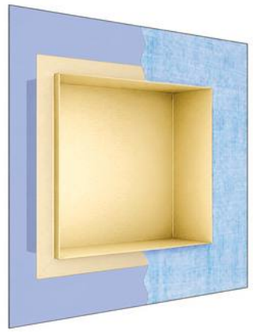

For reliable, standards-compliant waterproofing, every wall niche is factory-fitted with a fully integrated waterproof sealing membrane. This allows for easy integration into the GRUEN Smart Sealing System, an abP-tested bonded waterproofing system, ensuring maximum protection and reliability in wet areas.

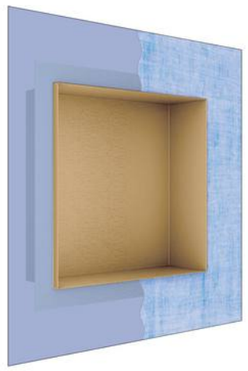

The enclosed stainless steel niche body is precisely fitted into the prepared housing and aligned to the thickness of the tiles used. The result is an elegant, durable and functional solution for modern shower and bathroom areas.

Our History

The GRUEN Story

Henry Gruen was a visionary bathroom designer. In 1946, he invented an easy-to-install comfort bathtub and was granted his first patent. Many more followed for innovative bathroom solutions, including mixer taps and anti-slip flooring. His products stood out for their ease of installation, comfort and distinctive design.

Inspired by his story, we created the GRUEN brand. Guided by our philosophy “Smart innovation, bathroom inspiration,” we offer bathroom design solutions that combine contemporary design with high functionality and straightforward installation.

Behind GRUEN Bausysteme lies the more than 50-year history of our parent company, Evimetal, based in Istanbul. With outstanding expertise in stainless steel processing and decades of experience in shower drainage and bathroom design, the company is now managed by the Altunç brothers — all architects and designers.

Evimetal products have received national and international design awards and have been installed millions of times, including in leading hotels and residential projects in Istanbul, Abu Dhabi and Dubai.

GRUEN Bausysteme GmbH was founded in 2021 with the ambition to bring intelligent, inspiring solutions to Germany and Europe. As a manufacturer and developer, we respond quickly to new technical requirements and evolving design trends.

Our portfolio includes products for floor-level showers, shower channels, shower niches, tile profiles and accessories.

Whether you are a tiler, plumbing and HVAC professional or specialist retailer, our experienced team is always available to provide expert advice. We work closely with our partners to adapt our products to their individual requirements.

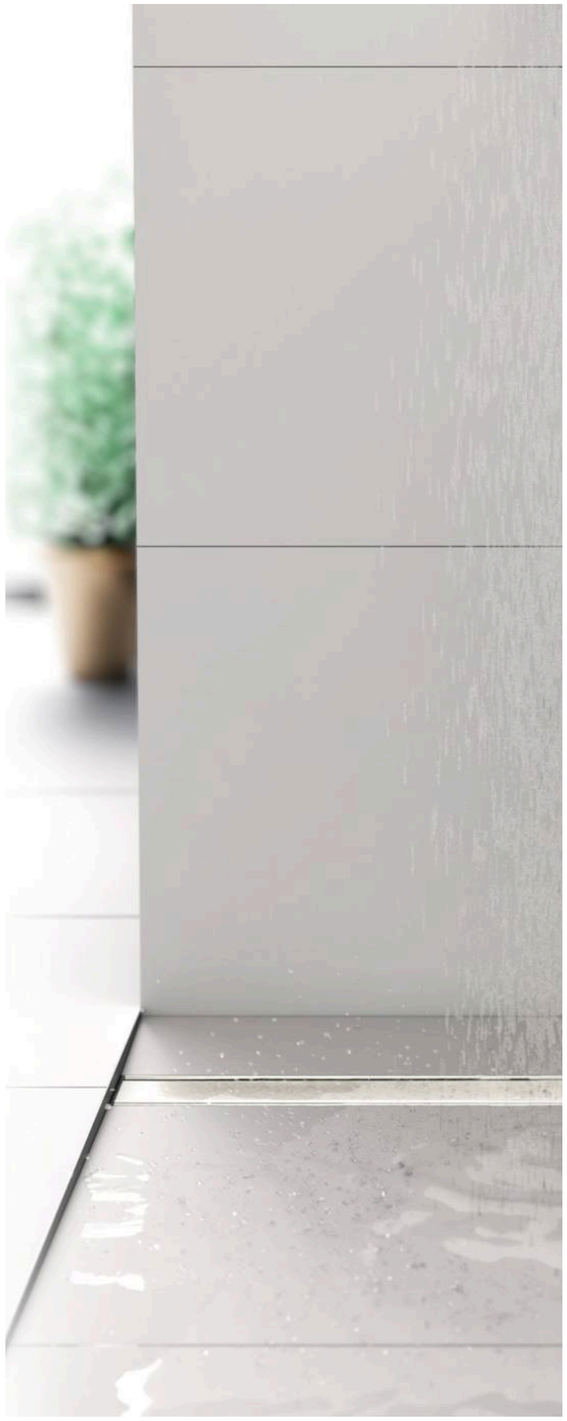

For developers, architects and clients, we offer a wide range of design possibilities and are happy to connect you with qualified trade professionals for your project.

Thanks to efficient production, a streamlined product portfolio and the consistent development of highly functional products, our solutions are equally attractive for private customers and construction projects.

Our vision — “Design and comfort for every bathroom” — brings us one step closer to our goal every day.

Discover GRUEN. Be inspired.

Every day, we work with passion to develop new, smart solutions that combine intelligent technology, functionality and inspiring bathroom design.
