

GruPan is a ready-made shower floor with an insulating membrane, inclined towards the drain in the center, and compatible with floor drain systems. It is designed to be completed in three practical steps aimed at saving time. Thanks to its smart parts, it can be safely applied to most drain systems and can easily tolerate areas with height differences. Due to its sliceable structure, it is compatible with many areas and the insulation textile is not damaged during the cutting process because of its special design. For this reason, insulation safety is ensured by applying the membrane practically without the need for any patching process. Perfect finishes according to your preference can be obtained in harmony with Gruen Floor Drains.

GruPan **Box List**

- 1 Cuttable, Sloped Pan
- 2 S Siphon
- 3 Pipe Connector
- 4 Locking Part
- 5 Height Adjustment Part
- 6a Floor Drain (Nova Cover)
- 6b Floor Drain (Natura Cover)
- 7 Flange with Sealing Membrane
- 8 Inner Edge Sealing Membrane (2)
- 9 Siphon Connector

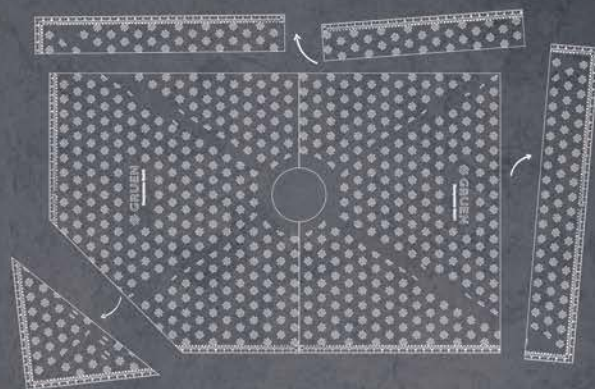

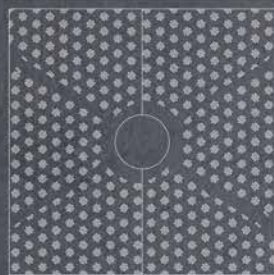

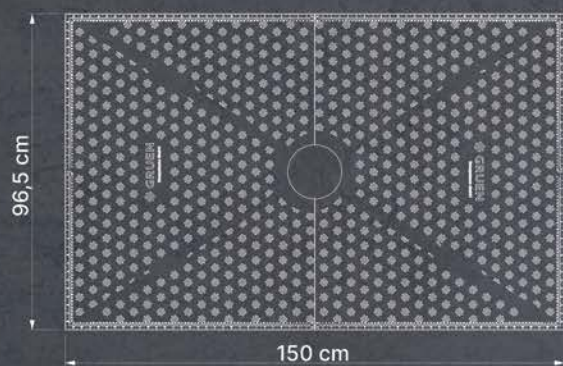

Sealing membrane is eligible to cover whole pan;  
moreover it is 15 cm bigger than from every edge of pan

color: satine	152x96,5 cm
Whole Set with Nova Cover	S1FD1-W965L1524E1
Whole Set with Natura Cover	S1FD5-W965L1524E1

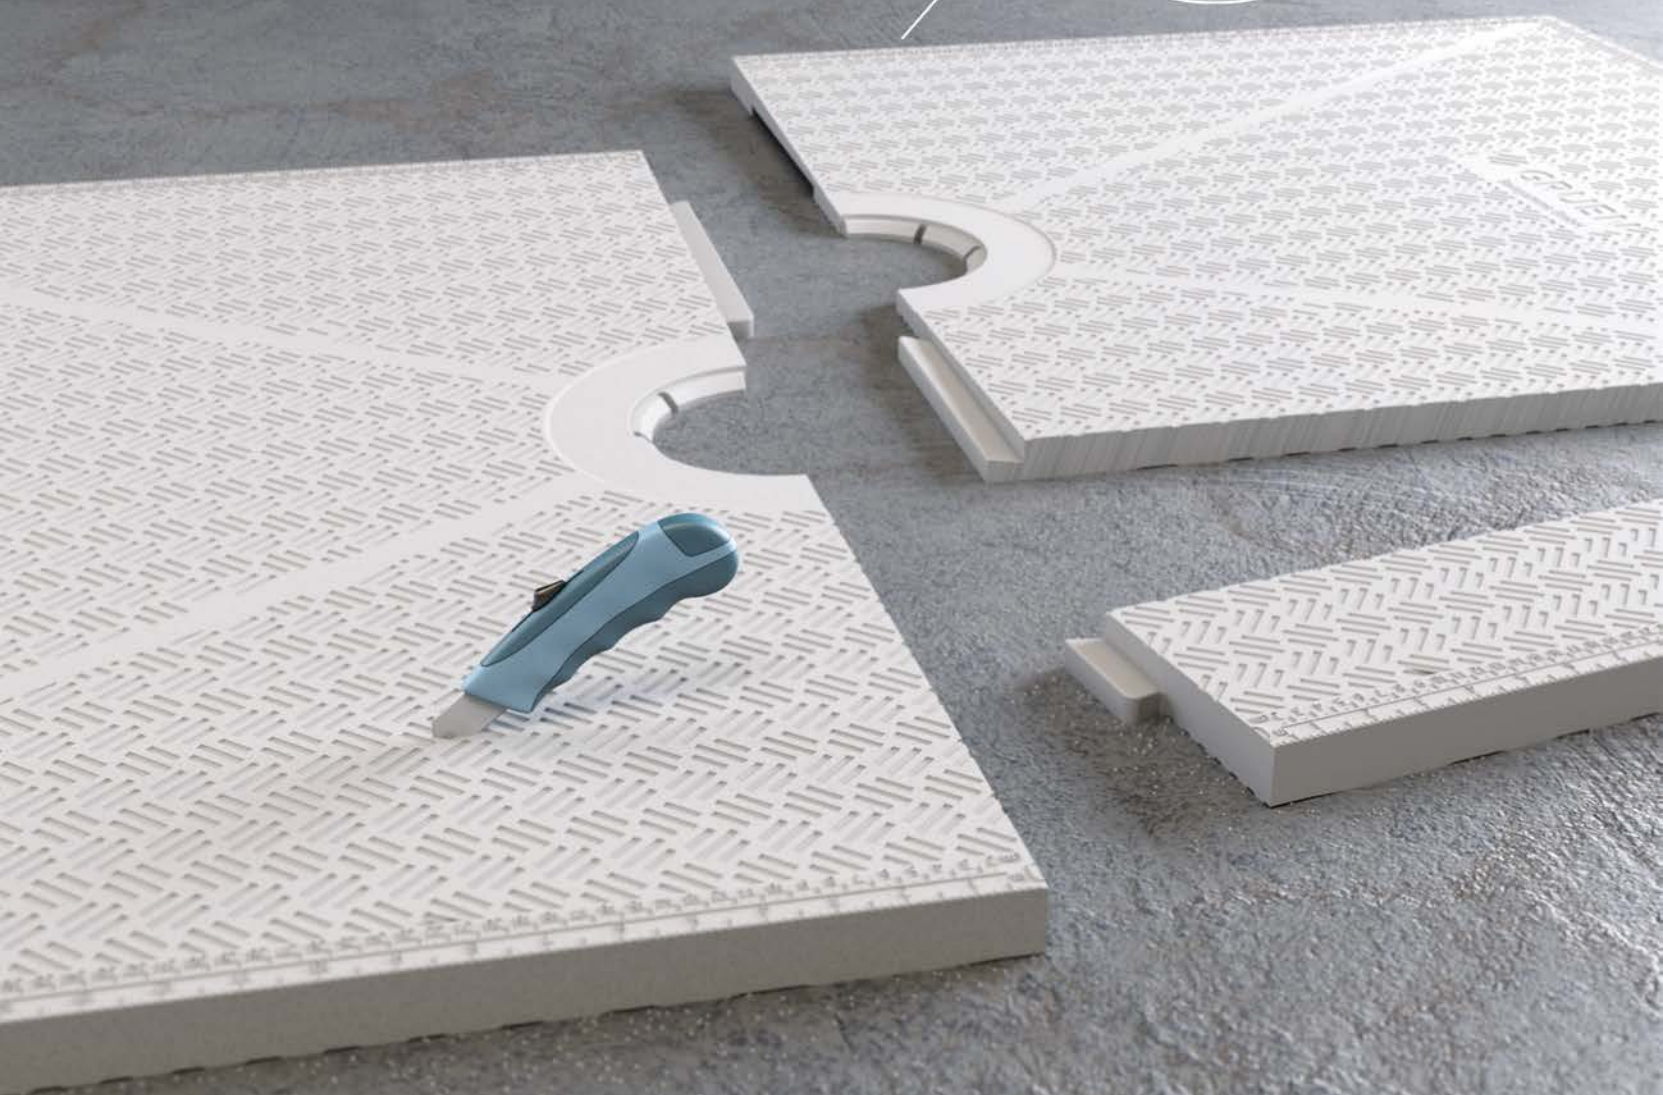

Suitable between  
150x96,5 cm

Cuttable

Can be cut thanks to its guides  
Suitable for almost every shower area

Easy to Install    time saving product

measure and cut **1**

Measure the area of shower, then cut the shower tray.

Sealing membrane does not affected cutting progress

**2** connect system to drain & spread the sealing membrane

Spread the sealing membrane to the walls for, maximum insulation.

Connect the system using pipe connector and lock them together with locking part.

Adjust the height **3**

Surface cover height differences can be tolerated by turning the height adjustment part.
